Reference No. \$375NH90IS  
CERCLIS No. NHD048722466

Dear Mr. Winterholer:

NUS Corporation is under contract to the U.S. Environmental Protection Agency (EPA) as a technical and management services contractor in support of the EPA's hazardous waste site assessment activities. In this support activity, the NUS Field Investigation Team (NUS/FIT) has been assigned the task of conducting a Screening Site Inspection of the Quinn KJ and Co Inc property located at 135 Folly Mill Road in Seabrook, New Hampshire.

As we discussed during our January 3, 1991 telephone conversation, NUS/FIT collects background information and analyzes the information to determine if collection of environmental samples is warranted. As per our conversation, it is my understanding that K.J. Quinn and Co., Inc. recently conducted groundwater sampling of the onsite monitoring wells and subsequently generated a report in November 1990. The information contained within the report would greatly aid NUS/FIT's evaluation of potential sampling activities for the Quinn KJ and Co Inc property. Therefore NUS/FIT formally requests a copy of this report and the analytical results.

Correspondence should be addressed to:

NUS Corporation  
19 Crosby Drive  
Bedford, Massachusetts 01730  
Attn: Alexander Easterday

If you have any questions, please call me at (617) 275-2970. Thank you for your cooperation.

Sincerely,

Alexander Easterday  
Project Manager

Approval:

Robert Jubach  
FIT Office Manager
